

QCAM FX BIAS (Business Intelligence Alpha Strategy)

FOR QUALIFIED INVESTORS ONLY | FACTSHEET FEBRUARY 2022

The Company

QCAM Currency Asset Management AG is an independent Swiss financial services provider that focuses primarily on currency and macro management. The investments offer an attractive risk/return ratio with low correlation and high liquidity. QCAM's services are precisely tailored to the aims and needs of an institutional clientele. The team of QCAM combines in-depth specialist knowledge, many years of experience in consultancy, client care and asset management for currency mandates, and an excellent international network of contacts. QCAM Currency Asset Management AG is regulated by the Swiss Financial Market Supervisory Authority FINMA and the U.S. Securities and Exchange Commission SEC.

The Program

FX BIAS offers alternative investment investors a systematic methodology to gain exposure in liquid currencies. The rule-based strategy uses business sentiment surveys for 8 countries/currencies (USD, EUR, JPY, GBP, CHF, CAD, AUD and SEK) to build a diversified currency portfolio. Currency exposures are weighted towards more liquid currency pairs which are less driven by noise and/or large order flows. The returns are over time uncorrelated to traditional asset classes and common risk factors in FX markets. The strategy can be customized regarding risk and return targets and is currently available via AMC's with UBS and separate managed accounts.

Redemption Fee	0.10% of NAV
Portfolio Exposure	up to 150% of base portfolio

Manager Comment

The FX BIAS certificate started February long EUR, JPY, GBP, AUD, CHF and SEK and neutral CAD, leaving a 88% net short USD position. In the course of February, the CAD position moved to short, resulting in a 82% net short USD position.

The FX BIAS USD certificate gained roughly 1.8% in the first half of February, but then lost ground as the conflict over the Ukraine deteriorated leading to the Russian attack at the end of the month. Still, the certificate managed to finish February with a gain of 0.5%. The performance of most currency positions was close to flat, with the main positive contribution coming from the long AUD and CHF positions, while only the long SEK position contributed negatively to the overall performance.

There have been no significant signal changes at the start of March and the overall position is roughly 85% short USD. So far, the attack on the Ukraine has not been captured by business surveys, but that is likely to change in the course of March and could lead to position changes.
