

# QCAM FX BIAS (Business Intelligence Alpha Strategy)

FOR QUALIFIED INVESTORS ONLY | FACTSHEET JANUARY 2022

## The Company

QCAM Currency Asset Management AG is an independent Swiss financial services provider that focuses primarily on currency and macro management. The investments offer an attractive risk/return ratio with low correlation and high liquidity. QCAM's services are precisely tailored to the aims and needs of an institutional clientele. The team of QCAM combines in-depth specialist knowledge, many years of experience in consultancy, client care and asset management for currency mandates, and an excellent international network of contacts. QCAM Currency Asset Management AG is regulated by the Swiss Financial Market Supervisory Authority FINMA and the U.S. Securities and Exchange Commission SEC.

## The Program

FX BIAS offers alternative investment investors a systematic methodology to gain exposure in liquid currencies. The rule-based strategy uses business sentiment surveys for 8 countries/currencies (USD, EUR, JPY, GBP, CHF, CAD, AUD and SEK) to build a diversified currency portfolio. Currency exposures are weighted towards more liquid currency pairs which are less driven by noise and/or large order flows. The returns are over time uncorrelated to traditional asset classes and common risk factors in FX markets. The strategy can be customized regarding risk and return targets and is currently available via AMC's with UBS and separate managed accounts.

Subscription Fee	0.10% of NAV
Redemption Fee	0.10% of NAV
Portfolio Exposure	up to 150% of base portfolio

## Manager Comment

The FX BIAS certificate started January half short EUR, fully long JPY, GBP, AUD, a quarter long SEK and neutral CAD and CHF, leaving a 26% net short USD position. In the course of January the EUR and the SEK positions moved both to 85% long and the CHF position to fully long, resulting in a 87.5% net short USD position.

The FX BIAS USD certificate gained roughly 0.5% in the first half of January, but then lost ground with the USD rally after the Fed meeting and finished January down 0.97%. The biggest losers where the AUD, the CHF and the SEK positions, while the EUR and the JPY positions lost only marginally.

There have been no significant signal changes at the start of February and the overall position remains 87.6% short USD. We also expect no major signal changes in February. The overall short USD position reflects improving business sentiment in most economies versus the US, a sign that global growth optimism is rising.
