

# Business Intelligence Alpha Strategy – FX BIAS

FOR QUALIFIED INVESTORS ONLY | FACTSHEET JULY 2021

## The Company

QCAM Currency Asset Management AG is an independent Swiss financial services provider that focuses primarily on currency and macro management. The investments offer an attractive risk/return ratio with low correlation and high liquidity. QCAM's services are precisely tailored to the aims and needs of an institutional clientele. The team of QCAM combines in-depth specialist knowledge, many years of experience in consultancy, client care and asset management for currency mandates, and an excellent international network of contacts. QCAM Currency Asset Management AG is regulated by the Swiss Financial Market Supervisory Authority FINMA and the U.S. Securities and Exchange Commission SEC.

## The Program

FX BIAS offers alternative investment investors a systematic methodology to gain exposure in liquid currencies. The rule-based strategy uses business sentiment surveys for 8 countries/currencies (USD, EUR, JPY, GBP, CHF, CAD, AUD and SEK) to build a diversified currency portfolio. Currency exposures are weighted towards more liquid currency pairs which are less driven by noise and/or large order flows. The returns are over time uncorrelated to traditional asset classes and common risk factors in FX markets. The strategy can be customized regarding risk and return targets and is currently available via AMC's with UBS and separate managed accounts.

Redemption Fee	0.10% of NAV
Portfolio Exposure	up to 150% of base portfolio

## Manager Comment

The FX BIAS certificate stabilized in July after the decline in June. The FX BIAS was long the EUR, the GBP and the SEK, short the JPY, the AUD and the CAD, and neutral the CHF until the last week, which implied a net short USD position of about 23% in July. As the USD rally faded in the course of July, the FX BIAS made up initial losses at the start of the month and finished with a small gain. In terms of performance contributions, only the short JPY position produced outright negative returns.

There has been one small signal change in the FX BIAS at the end of July. The CHF position switched from neutral to long versus the USD. At the moment, the FX BIAS is long EUR, GBP, CHF and SEK and short JPY, AUD and CAD, which on balance results in a net short USD position of about 29%. We expect no significant signal changes with the next business survey results in August.
