1 year research cooperation with Wellershoff & Partners AG featuring the bulletin *FX Monthly* as its flagship

In October 2015 QCAM Currency Asset Management AG launched a strategic cooperation with the independent consulting and research company Wellershoff & Partners AG. One result of that is FX Monthly, a monthly bulletin that has become an indispensable source for decision-making of many investors.

Cooperation of independent specialists

Facing complex and volatile markets investors are increasingly depending on the profound and comprehensive assessment by experts as the basis of their decision-making. This trend was crucial for Currency and Asset Management Specialist QCAM to commence a strategic research cooperation with Wellershoff & Partners AG a year ago and to launch the monthly bulletin *FX Monthly*. QCAM CEO Thomas Suter: „With *FX Monthly* we are offering our clients and subscribers of the bulletin on a monthly basis concentrated information in the area of our core competence „currencies“ and beyond. This cooperation which also includes co-hosted customer events has been a very enriching experience for us.”

Every month broad and in-depth contents

FX Monthly is unrivalled in Switzerland and internationally. Next to the editorial with the title „QCAM Insight“ which takes up typically a current topic the bulletin comprises a series of fixed sections such as „Macro Perspective“, „What moves currency markets“, „Economic Activity“, „Inflation and interest rates“ and last but not least the often striking „Number of the month.“ Felix Brill, CEO at Wellershoff & Partners AG: „With *FX Monthly* a unique source of information was created which supports investors to put the global economic and social forces into context of their investment decisions.”

FX Monthly is published both in English and German. Interested readers can register on QCAM's website for free of charge electronic delivery: <http://q-cam.com/fx-monthly/>

QCAM Currency Asset Management AG – with its specialization in the field of currencies the independent Swiss Asset Manager offers its clients a customized and personalized service in Currency- and Asset Management. QCAM is regulated by Swiss Financial Market Supervisory Authority FINMA and U.S. Securities and Exchange Commission SEC.
